SUBJECT: TURKMEN GAS TO RUSSIA TO RESUME IN JANUARY

REF: 09 ASHGABAT 1654

11. (U) Sensitive but unclassified. Not for public Internet.

12. (SBU) On December 31, 2009, several Russian media outlets cited a Gazprom spokesman saying that Gazprom will resume imports of Turkmen gas on January 9, 2010 at 10 a.m. Turkmen gas and Gazprom agreed to resume gas supplies during President Medvedev's December visit to Ashgabat (reftel). Gazprom originally announced that the supplies would restart between January 1 and January 10. To date, no information has been officially disclosed by Turkmen authorities as to the price and volume of Turkmen gas deliveries to Russia, or the exact date that gas supplies will resume.

13. (SBU) An official at the Turkmen Oil and Gas Ministry refused to confirm the date gas exports to Russia would resume, but mentioned that Turkmenistan's gas export facilities are ready for the resumption of deliveries, adding that Turkmen gas is prepared to re-start gas imports at any time. The official also mentioned that most of the Russia-bound gas will originate from the Dowletabat gas field, as was the case before the April pipeline explosion. Although media reports continue to speculate that Russia plans to purchase only 10 billion cubic meters (bcm) of Turkmen gas in 2010 (in 2008 Gazprom reportedly purchased 49 bcm), Gazprom and Turkmen gas officials have stated that Russia has the option to purchase up to 30 bcm of gas per year.

14. (SBU) COMMENT: The resumption of gas deliveries to Russia has received scarce mention in Turkmen media. It is possible that the price and/or volume are not as high as the Turkmen would like. At the same time, both parties have left the door open for additional volumes, should Russia see a need for more gas in 2010. END COMMENT.
